Professional services

Team up with Nviron.

Nviron™
Simplifying IT

IT that works for you

Over the years, we've built strong, trusted relationships with some of the biggest names in tech including Microsoft, Dell Technologies and Technologies.

Our team puts real time and energy into staying sharp, earning the latest certifications and keeping up with the ever-changing world of IT. We're always learning, adapting and staying ahead with the latest technology and industry developments.

We're proud to hold key industry accreditations like ISO 9001, ISO 27001 and Cyber Essentials Plus, so you can be confident you're working with a team that knows their stuff and puts quality and security first.

Your business is unique to you, as is your way of working. That's why we've devised three clear engagement types for our professional services, ensuring the right choice is available for your project.

Key features

Fixed price

Fixed project engagement is ideal when you want a clearly defined outcome, an agreed cost and Nviron to take responsibility for delivery.

Before the project begins, our Technical Pre-Sales and Consultancy teams will work with you to understand your requirements, design the solution, and agree the project deliverables, assumptions, and acceptance criteria. Once the scope is agreed, Nviron will provide an overall fixed price for the Professional Services required, including a named Project Manager.

The project is then invoiced against agreed delivery milestones.

If requirements change during the project, we will explain the impact and agree any variation to the scope, cost or timescales before proceeding.

Time & materials

Time & materials provides a commercially flexible way to access Nviron's Professional Services expertise while working towards your required objective.

Before work begins, we will outline our understanding of the requirement, the anticipated activities and a good-faith estimate of the time and skills required.

Unlike Fixed Price, you are charged for the time actually delivered, so the work can adapt as requirements or priorities develop.

Services can be invoiced as they are used or drawn down from your available Pre-Purchased or Contracted days.

If project co-ordination is required, this will be included within the estimate.

Time & Materials is ideal when you want greater flexibility over the delivery approach, the use of specialist resources or the way Professional Services are commercially consumed.

Infrastructure

Microsoft Windows Server

World-class solutions founded on the Windows Server platform

Dell Technologies PowerStore and ME Storage Platforms

World-class system host and storage platforms

Microsoft Azure Local

Hyperconverged infrastructure platform with Azure integration

Dell Technologies Private Cloud

Multicloud nodes for hybrid cloud deployments

Microsoft Azure Virtual Desktop

Advanced Cloud hosted VDI solution from Microsoft

Dell Technologies VxRail

Integrated Hyperconverged infrastructure platform on VMware by Broadcom

Microsoft Storage Spaces Direct

Server and ready node hosted virtualisation

Microsoft Hyper-V

Microsoft virtualisation deployment and evolution on Windows Server

VMware vSphere and vSAN

VMware by Broadcom, software defined virtualisation and storage

Dell Technologies PowerEdge Servers

Market leading server infrastructure implementation

Omnissa Horizon

Advanced VDI solutions from Omnissa

Batch Client Device Deployment

Efficient customisation and rollout of laptops, desktops and tablets

APC UPS

Implementation and configuration of advanced UPS

Co-location

Infrastructure hosting and migration services

Linux Infrastructure

Appliance and system deployment

Secure Networking

Fortinet Networking & Wi-Fi

Secure wired and wireless networking solutions

Cisco / Meraki Networking & Wi-Fi

Secure wired and wireless networking solutions

Dell Technologies Networking

Advanced Solutions across S, N & X series and OS10

Ubiquity Wi-Fi Networking and Infrastructure

Wireless access solutions from Ubiquiti

Ruckus Networking & Wi-Fi

Secure wired and wireless networking solutions

HPE / Aruba Networking and Wi-Fi

Secure wired and wireless networking solutions

SonicWall NextGen Firewall

Internet security solutions

Azure Secure Networking

Advanced Networking and DNS service for the Microsoft Azure platform and fabric

Kemp Load balancing appliances

Appliance based balancing for web access applications

Software Defined & Point to Point Wide Area Networking

Installation, security and management of WAN and Internet services

Aerohive Wi-Fi infrastructure

Wireless access solutions from Aerohive

Digital Certificates and PKI Infrastructure

Mixed use certification infrastructure configuration and deployment

FortiGate NexGen Firewall

Advanced physical, virtualized and cloud NextGen firewalls from Fortinet

Fortinet ZTNA / FortiClient

Remote access and security from Fortinet

Netgear Networking

Secure Wired access solutions from Netgear

Draytek Vigor Firewall

Network security from Draytek

Business Continuity

Dell Technologies DataDomain

Advanced deduplication and backup vault appliances

Microsoft System Center DPM

Advanced backup and replication technologies from Microsoft

Microsoft Azure Backup

Utilising Microsoft Azure for your backup data

Microsoft Azure Site Recovery

Replication, failover and recovery using Microsoft Azure

Veeam Backup & Replication for M365

Backup for your M365 environment

Veeam Backup & Replication

Backup and Replication for virtual, cloud, physical and immutable requirements

Veeam Cloud Connect

Cloud backup for virtualised infrastructure

Veeam Availability Orchestrator

Disaster Recovery orchestration and automation

System Replication Solutions

Hyper-V and VMware virtual machine replication solutions

Veeam Data Vault

Advanced Cloud based immutable storage

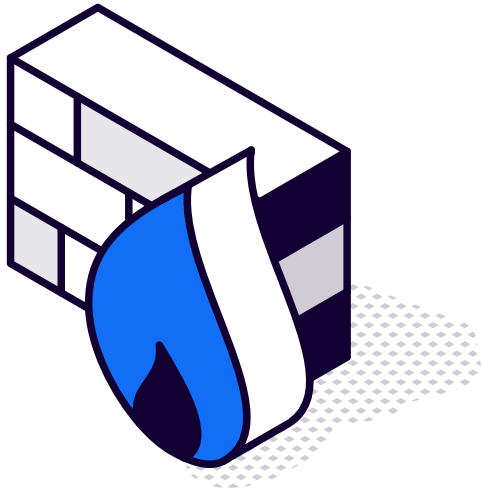

WASABI

Cloud and On-premises immutable backup storage

Object First

On-premises immutable backup storage appliances

Cyber Security

Cyber Essentials & Cyber Essentials Plus
Help with governance & compliance. Attain and maintain certification

SentinelOne
Endpoint threat protection from SentinelOne

FortiMail
Cloud hosted email security from Fortinet

Forcepoint Web Filtering
Centralised cloud hosted email and web security

Microsoft BitLocker Encryption
Windows encryption technology for your data

Microsoft Defender
Integrated device and Exchange Online security from Microsoft

Microsoft Azure Entra & MFA
Conditional and authentication security technologies

Azure Application proxy
Web access application separation and security

Microsoft Purview
Azure Information protection, DLP and enhanced security features

Azure Tenancy Security
Baselining and best practice configuration and protection for Azure

Microsoft Sentinel
Scalable, cloud-native security information and event management

Always on VPN
Secure remote access services

usecure
Phishing simulation and user cyber awareness training

Microsoft

Microsoft 365 Suite

Cloud Solution provider (CSP) deployment and configuration services

Microsoft Active Directory

Services design, update and evolution

Microsoft Azure

Services including migrations, Landing Zones tenancy creation and optimisation

Microsoft Copilot & Cowork

Leverage the power of AI to boost productivity

Azure Virtual Desktops

Cloud hosted desktop services from Azure

Microsoft RDSH

On-Premises hosted desktop services

Microsoft Intune

Cloud-based endpoint management solution

Microsoft Autopilot

Technologies for device set up and configuration

Microsoft Endpoint Configuration Manager / SCCM

Windows centric endpoint management services for AD connected devices

Microsoft Exchange

Deployment and directory integration for Exchange online and on-premises

Microsoft Fabric

Microsoft's unified Cloud platform for data analytics and business intelligence

Our partners

Nviron has established strong relationships with leading technology providers and security sits at the heart of everything we do. We harness the technology developed by some of the most revered names in the industry to create exceptional services and solutions.

Simplifying IT, empowering business.
